

Group 12 Diary

23/03/2022

- Marcus outlined a potential plan for structure of the group assignment
- After some discussion, the group decided the only available time for everyone to meet was from 3 pm - 5 pm on Saturday the 26th of March
- We also decided that we should all come prepared with ideas of entities, attributes, and relationships based on the activities of World Cruises (WC) so that we could finalise and come to a consensus on what should be included in the full conceptual model (Entity Relationship Diagram)

26/03/2022

- A meeting was held for an hour and a half where we discussed and formed a group plan on the entities, attributes, and relationships to include in the ERD. This was formed by combining and discussing everyone's initial plans.
- To ensure that everyone contributed equally to the task we assigned three entities for each person to model on the ERD.
- To achieve an adequate of pushes and record our progress we decided to commit as per below
 - Commit after making your assigned three entities
 - Commit after filling all attributes in your entities and identifying key attributes
 - Commit after making relationships with all existing entities

28/03/2022

- The assignment was discussed at the end of class time between Marcus and Dylan. To begin finalising the assignment and to discuss certain issues that we were facing. These issues concerned:
 - The entity CRUISE_PORT's attributes and existence
 - Certain relationships between entities

30/03/2022

- We finalised some final issues including, relationships, entity's attributes,
- Marcus discussed with both Madhu and Dylan, the concerns he had upon certain entities and their attributes.
